

Microsoft 365 CoPilot Tech Ready

Prepare and secure your IT to embrace the possibilities with Microsoft 365 Copilot

Copilot for Microsoft 365 is the virtual assistant that helps you work smarter and more efficiently. CoPilot will change the way we work. It can improve your workflows, automate tasks, and bring more efficiency and new intelligence to your daily work.

Securing your Microsoft 365 tenant is essential before implementing AI tools like Copilot. This to ensure that your data keeps protected and confidential. But also, that you can safely and efficiently take advantage of the features that CoPilot offers.

Kickstart your CoPilot deployment with confidence through our dedicated CoPilot Tech Ready Assessment. We'll guide you in crafting a robust deployment strategy that safeguards your data and empowers you to unlock the full potential of CoPilot.

1 Get Technical Ready

Before starting to use CoPilot, establishing robust security measures is fundamental. This is key to reducing the risk of security breaches and preventing data loss.

3 Assess your security

Our experts will review your existing security measures within Microsoft 365, focusing on data protection, identity and access management, device control, and application security.

2 Grasp the Technical Essentials

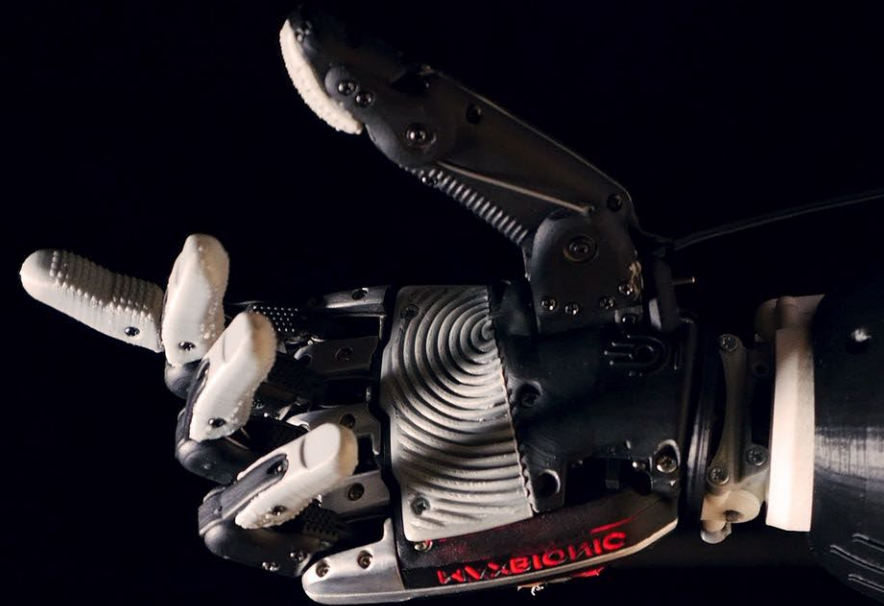

Gain a clear understanding of how CoPilot functions and the essentials for maximizing its benefits.

4 Get insights in needed changes

Based on the insights from the assessment, we evaluate your current state and advice recommended changes.

Assessment steps

1. Start-up meeting
2. Copilot overview
3. Questionnaire
4. Base technical assessment
5. Data security
6. Identity & access management
7. Endpoint management
8. App management
9. Status summary
10. Presentation of report and roadmap

Outcomes

Report

A report that outlines the essential technical steps for integrating Microsoft 365 CoPilot into your business, ensuring a smooth transition

Roadmap

A visual roadmap of the security infrastructure required for CoPilot, detailing the components you'll need for robust data protection

Requirements

Insights into the specific requirements and the level of effort needed to fortify your information security posture during CoPilot implementation

Recommendations

Tailored recommendations and schedule time with our security experts to guide you through your CoPilot journey, from start to finish.
