Meet Easy Clear & simple portfolio for the Entire Digital Workplace

Where Samsung has the monitor, Logitech has the mouse, keyboard, headset and webcam for the perfect personal workplace. Where Logitech has the Video Conferencing solution for every size of meeting room, Samsung has the right display.

Logitech and Samsung fit together like matching puzzle pieces. “Just like the perfect marriage, we compliment each other, making each other even better. We both develop products of high quality, that are easy to use, install and maintain. Our collaboration is a perfect fit”.

Together Logitech and Samsung have created special bundles for the personal workplace and for meeting rooms. The purpose of the bundles is to help both end-customers and resellers to ease the orientation process, and offer solutions that work.

In this document you will find the workplace and meeting room bundles we created for you. Please contact your Logitech or Samsung account manager if you have any questions.

Samsung

Samsung's SMART Signage professional displays are large format monitors designed to display any content in ultra-high definition with incredible rich color on a slim, efficient design. With powerful hardware and software timing and content launch (MagicInfo), Samsung SMART Signage is the ideal solution for almost any environment. With security provided by Knox, the displays feature Samsung Workspace.

This supports wireless cloud service access and connectivity to any PC without needing a physical connection. Samsung Workspace simplifies meeting spaces while also improving security.

With an inch size of 43 inch, this large sized display is perfect for small meeting rooms up to 6 people, and a better alternative to conventional projectors.

Logitech

For Extra Small Meetings Logitech designed the Rally Bar Huddle, this is a premium all-in-one video bar for huddle spaces. Designed to deliver equitable video conferencing meetings with ease, Rally Bar Huddle is quick to set up, simple to manage, and easy to integrate with Tap IP through CollabOS.

With security provided by Knox, the displays feature Samsung Workspace.

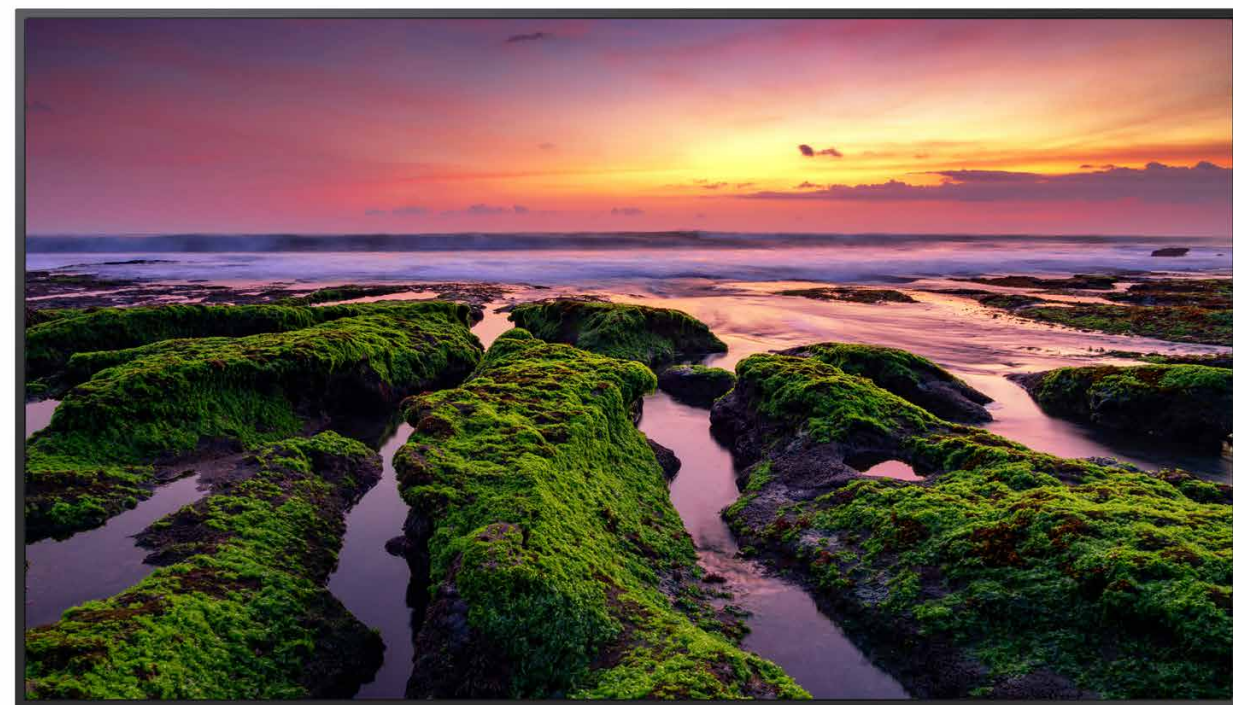

This supports wireless cloud service access and connectivity to any PC without needing a physical connection. Samsung Workspace simplifies meeting spaces while also improving security.

With an inch size of 55 inch, this large sized display is perfect for small meeting rooms up to 6 people, and a better alternative to conventional projectors.

Logitech

The Logitech Small Meeting Room kit with Tap and Rally Bar Mini is designed specifically for the huddle and smaller meeting rooms, and minimizes the need to pull cables. Thanks to its compact design, Logitech Rally Bar Mini can be easily placed under or above the display with the optional TV Mount. Logitech Tap can be mounted on the table or on the wall. Mounting accessories are available for both options.

Samsung

Samsung is the premier leader in display technology and is continually stretching technology further into the future. This is evident in our stunning (curved) screens with pristine images and the most realistic colors that are manufactured today.

Samsung's business monitor line-up offers a solution for all the needs that companies and people working from home might have. The line-up stretches from flat to curved panels, FHD to QHD resolution, and there are monitors that have USB-c power and USB docking solutions. These and many other useful features help employees maximize their productivity.

Logitech

The right tools are needed to deliver the best possible work, whether you are at home or in the office. Now that video communication is more important than ever, the right webcam and headset have become your work essentials. A conversation where people are heard poorly and not seen properly, can be frustrating and is time consuming. A call with the right video communication tools can be just as good as a real-life meeting.

When people work from their laptop and are not equipped with a good monitor, keyboard and mouse, physical complaints can easily arise. Using an external keyboard and mouse can help to create an ergonomic workspace, so people stay healthy and happy.

32" ViewFinity UHD Monitor with IPS panel and USB Type-C

- Resolution: UHD brings 4x more pixels than Full HD for a larger workspace with total clarity
- View documents with less scrolling, keep more apps and windows open, and see even the tiniest details in designs, photos, and videos
- Pantone Validated™: View every hue with true-to-life accuracy. Backed by the world leader in color development. Now your work looks as good on your monitor as in the real world
- VESA DisplayHDR 400 (27") / 600 (32"): A richer color reproduction for lifelike images, 1 billion colors for color accuracy and deep blacks with bright whites with HDR, for the most vibrant color ever
- Matte panel: As the world's first glare-free monitor verified by UL, the Matte Display technology enables professionals to review and edit with consistent levels of brightness and colors without being disturbed by bright daylight
- Also, no need for bulky hood covers with a super anti-glare, anti-reflection film

Logitech

- Full HD plug-and-play webcam certified for the major video calling platforms
- Deploy Brio 505 with confidence to workstations and home offices
- Offer employees a wireless over-the-ear headset that is built for business, compatible with VC platforms, and perfect for working from home. Encourage adoption and reduce helpdesk tickets
- Our top-of-the-line combo delivers for ITDMs facing ever greater IT security needs with Logi Bolt. It offers robust, secure connections even in congested wireless environments
