

a-JAYS® One+

Tangle-free cables with mic and remote

MOBILE MUSIC

Plus Control

On a-JAYS One+ we've added a one-button remote so you can control talk and music on your mobile device. You get the same award winning sound as on a-JAYS One and our beloved tangle free cables. Out of the box you can control Play/Pause, Answer/Hang up and with the free of charge JAYS Headset Control App for Android you will be able to add functions such as volume control, track control etc. Go check it out and experience something new, something great!

Flat tangle-free cables

Stop worrying about tangled cables and ill-fitting ear pieces. The a-JAYS Series is bursting with product innovations such as the JAYS-developed, tangle-resistant, flat cable and is supplied with up to five pairs of silicone sleeves designed to give you the best possible earphone fit meaning that you can take superior sound and design quality with you wherever you go.

Made for many

The a-JAYS One+ is developed for a wide range of cell phones on the market. It works with most HTC, Samsung, BlackBerry, LG and Apple devices and gives you a great sound experience and a fantastic speech quality. a-JAYS One+ is iOS, Android, Windows Mobile and Skype compatible.

JAYS Headset Control™

Discover even more features with JAYS Headset Control app for Android. With this app you can now turn your a-JAYS One+ into a fully customized multi feature control. Change volume, skip songs, voice control and much more. And of course it's free.
