OmniView Secure KVM 4-Port

Protect classified computers with a NIAP-validated USB KVM switch

Protect classified computers with a NIAP-validated USB KVM switch

Designed specifically for secure military and government installations, the OmniView Secure KVM Switch lets you control multiple USB computers from a single USB console. This product ensures the integrity of your data by safely switching among classified and unclassified computers. The Switch features a dedicated processor per computer port to keep each computer separate and secure at all times, and prevent data transfer among them.

Note: *This product is listed by the National Information Assurance Partnership (NIAP). It is validated in accordance with the provisions of the NIAP Common Criteria Evaluation and Validation Scheme to EAL 4 (Evaluation Assurance Level 4).
