Weight		13.2 lbs.	
Supplied Accessories		Power cord with security lock, wireless remote control unit, batteries for remote control unit (AA/R6/LR6 type x 2), lens cover, software CD-ROM (Logo Transfer Software, Multi Projector Monitoring & Control Software Ver. 2.5, Wireless Manager ME 5.5)	

THE NEW FW430 SERIES WITH FLEXIBILITY BUILT-IN

panasonic.com/business-solutions

YOU'LL FIND THE FW430 SERIES EXTREMELY ACCOMMODATING.

INCREASED FLEXIBILITY FOR EASY INSTALLATION AND OPERATION.

Panasonic's new-generation FW430 Series projectors are easy to install, user-friendly and reliable. With features such as a 2x zoom lens, horizontal/vertical lens shift and HDMI / DVI-I digital input terminals, these high-performing projectors fit well within existing mounting positions and cabling, thereby eliminating the need for potentially disruptive and costly construction. In new installations, the same features easily accommodate a wide range of room sizes and shapes.

For complete freedom of use, the optional wireless module (ET-WM200U) enables wireless operation from one or multiple laptops located anywhere in the room. A wireless projection application is free and available on the App Store that makes it possible to use the iPad®, iPhone® or iPod touch® with iOS 4.1 for wireless presentations with the FW430 Series projectors.

PT-FW430U AND PT-FX400U KEY FEATURES:

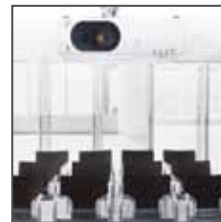

IMPROVED RELIABILITY WITH EASY MAINTENANCE

- An original lamp drive system enables a 6,000-hour lamp replacement cycle,*¹ giving you more time for brilliant presentations.
- A dust-resistant cabinet and a new, reusable Eco Filter with a 12,000-hour replacement cycle*² protect the internal electronic components from dust.
- The lamp is easily replaced from the rear and the filter is quickly replaced through the side panel, even while the projector is mounted on a ceiling.

*¹ This value is calculated by continuously turning the lamp on for 2 hours and off for 0.25 hours. The lamp replacement cycle will decrease if the lamp is turned on/off more frequently, or if it is left on for longer intervals.

*² The usage environment affects the duration of the filter.

SUPERIOR IMAGE QUALITY IN ANY ENVIRONMENT

- Panasonic's Detail Clarity Processor 3 brings depth and clarity to details.
- Daylight View Premium senses the ambient light and adjusts output for sharp, clear images even in brightly lit rooms.
