

Chromebase Commercial

Commercial Grade Chrome Based 22" All-in-One Touch Display

Introducing the Chromebase Commercial 22"; especially designed for commercial use. The Chrome based multi-touch display is ultra-thin and exceptionally powerful.

The Chromebase Commercial is a solid-state device designed to be extremely robust and secure, making it ideal for interactive public display in high traffic environments (i.e. as a digital signage, POS or kiosk system). For connecting other devices such as POS peripherals and authentication devices (i.e. Biometrics), the Chromebase Commercial has commercial ports, ruling out the need for multiple power cables.

Chrome device management allows administrators to manage their organization's Chrome devices from a single place. Integrators can also use the signage app of their preference available via the Chrome Web Store to control what's on the screen.

The advantages of the Chromebase Commercial 22":

- A commercial grade multi-touch, all-in-one display that is based on Chrome OS.
- Tough and tamperproof design for 24/7 operability in public spaces.
- Commercial ports for connecting POS peripherals and authentication devices.
- Good viewing angles in landscape and portrait.
- Endless mounting options: recessed into surfaces e.g. benches, walls and kiosks; mounted on a wall.
- Optional Chrome Device Management on request to save valuable time and thus costs on installation, programming and maintenance.
